

Career Journey

Originally graduated with a BS in Aviation Technology, I discovered my passion for technology and software development after earning my **Microsoft Certified: Azure AI-900 Fundamentals** certification, which inspired me to transition into the tech industry. With the help of AI tools that accelerated my learning, I completed **Zuitt’s Full-Stack Web Development Bootcamp**, gaining hands-on experience in modern web technologies. I’m now focused on building **intelligent, scalable, and user-driven applications** while continuously expanding my skills in **mobile and software development** and also **cloud technologies**.
