PROFESSIONAL SUMMARY

Frontend Developer with full-stack experience in React, Next.js, Node.js, and MongoDB. Builds scalable, accessible web applications with REST API integration, authentication, performance optimization, and AI-assisted development — with a track record of delivering production-ready solutions that improve workflow efficiency.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, Vue.js, Tailwind CSS, Bootstrap, shadcn/ui

Backend & Databases: Node.js, Express.js, MongoDB, PostgreSQL, Prisma

APIs & Security: REST APIs, Authentication, Role-Based Access Control (RBAC), Input Validation, Error Handling

Testing & Tools: Mocha, Chai, Unit Testing, TDD, Git, Postman, AWS, Vercel, Figma

Development Practices: Responsive Design, Accessibility (WCAG), Performance Optimization, AI-Assisted Development (Claude CLI, Gemini CLI, Trae, ChatGPT, Claude & Gemini web)

WORK EXPERIENCE

Front-end Developer
April 2026 – Present

WPP Production – Apple (Korea)

- Localized web pages in line with Apple's global design standards, ensuring brand and UX consistency across markets.
- Ensured accessibility (WCAG 2.1 AA), responsiveness, and cross-browser quality.
- Worked daily with Apple's internal tooling and workflow stack — Versions, Slack, Timeline, Interlinked (Apple's internal AI), Apple's Claude CLI, and the Mac terminal — and used browser dev tools in depth to inspect, debug, and verify pages across markets.
- Collaborated cross-functionally with the Head of Interactive, Senior/Lead Developers, Project Managers, and Local Managers across Manila and Korea, providing clear visibility into team progress and project status despite time zone and location differences.
- Consistently delivered work above expectations, building trust with both the Manila and Korea teams.
- Trained and mentored new hires, improving the daily quality and efficiency of output across the Manila team.
- Redesigned and restructured the dev team's training deck, making onboarding materials clearer and easier to follow.

Freelance Web Developer
Feb – Mar 2026

Independent Contractor — Clients: AMEN Pest Control, HVAC Rescue LLC

- Designed, built, and deployed full websites for two service-based businesses, from initial development through production launch.
- Configured domain DNS records (A, CNAME, MX) and SSL certificates for both client domains.
- Implemented Meta Pixel tracking to support client lead generation and marketing performance monitoring.
- Worked with GoHighLevel (GHL) alongside the website build to support the client’s lead management and marketing automation.
- Managed client communication, project timelines, and technical delivery independently.

Operations Supervisor
2020 – 2024

MariClaire Group of Business (Family-Owned)

- Directed daily operations across a diversified business portfolio — including a water refilling station, meat shop, and convenience store — maintaining consistent service quality across all units.
- Scaled water station production by up to 300% through targeted workflow optimization.
- Supported business expansion efforts that led to the launch of an additional branch location.
- Managed inventory control, sales tracking, and operational reporting.
- Analyzed customer behavior trends to identify opportunities for improved efficiency and service delivery.

TECHNICAL PROJECTS

All projects below were built with AI-assisted development (Claude CLI, Gemini CLI, Trae, ChatGPT, and Claude/Gemini in the browser), with hands-on review, testing, and debugging.

Water Station Online Ordering System – Next.js, React, Prisma, PostgreSQL *Jan 2026 – Present*

- Built an order management platform modeled on a real family-run water refilling business, with multi-role authentication (Admin, Rider, Customer).
- Developed a full order lifecycle system, including tracking, assignment logic, and status updates.
- Designed to replace manual order processing with a digital workflow, automating order assignment and status updates.
- Built synchronized dashboards across roles to improve real-time operational visibility.
- Optimized performance for mobile devices and low-bandwidth network conditions.
- Implemented secure API routing with structured error handling.

Full-Stack Application Portfolio – MongoDB, Express, React, Next.js, Vue.js, Node.js

- Built production-style full-stack applications (e-commerce, booking, social platforms) simulating real-world system architecture.
- Designed database schemas, authentication logic, and CRUD systems from the ground up.
- Integrated frontend clients with REST API backends across multiple projects.
- Deployed and hosted a Node.js/Express backend on an AWS cloud server, configuring the environment and managing the live API.

Front-End Client Mockups – React, Next.js, Tailwind CSS *Nov – Dec 2025*

- Built responsive landing page designs and prototypes based on client-provided mockups.
- Translated design requirements into functional front-end components.

EDUCATION

Full-Stack Web Development – Zuitt Coding Bootcamp
BS Aviation Technology – Indiana Aerospace University

CERTIFICATIONS

- Full-Stack Web Development — Zuitt Coding Bootcamp, September 2025
- Meta Front-End Developer Certificate — Introduction to Front-End Development, Meta, June 2026
  Programming with JavaScript, Meta (In Progress)
- Unit Testing Essentials — Zuitt, January 2026
- Microsoft Certified: Azure AI Fundamentals (AI-900), June 2025
- Google Data Analytics Foundations, December 2025
- Career Service Professional Eligibility, CSC Philippines, October 2024
